WEEKLY GEMS TRADING STRATEGY, AND HOT LIST!

**A STRATEGY TO FIND SUCCESS TRADING
OPTIONS**

By Mike Rykse

**Options Specialist
NetPicks.com**

Welcome Traders!

My name is Mike Rykse, and I'm the Options Specialist at NetPicks. I have been an active trader in the markets since 2002 and have traded just about every market available (stock, options, futures, forex, bonds).

Without a doubt, my favorite area of the market is trading options. That's where I've seen the most success.

I've personally developed numerous options trading systems and educational courses over several years. All are designed to provide traders, like you, the tools you need to be successful trading the options markets.

My programs have been used by thousands of traders in over 100 countries over the last 13 years.

While working with thousands of traders over the years, I have learned some tricks of the trade. I believe these insights can make a big difference in your trading results over time.

Trading can be difficult. But, having a specific process and tool set can help you become a successful trader right away.

Like any successful business, the traders seeing the most success stick to a plan. Whether you're trading full time or part time you need to treat Options Trading as a business.

It means having a plan in place to guide you every day. A big part of the plan is knowing the markets you trade like the back of your hand.

In this eBook I'm going to share a portion of my hot list - which is simply a list of the BEST stocks to monitor for options trades!

I'm going to show you how to focus on a small universe of stocks. This focus will help you find consistent returns in just minutes each day. I'll share the exact names that I focus on. You'll see why I choose the names for my watch list and how I trade these options for profit!

Keep an eye on your email account as I'll be sending you some more info on Options trading in the next few days...

If you have any questions I can help with, as you work through this training, please feel free to contact me directly. You will find my contact info below. I look forward to hearing from you.

Happy Trading!

Mike Rykse

Options Specialist

WEEKLY GEMS STRATEGY

We have an [entire webinar explaining our weekly gems trading strategy...](#) so I'll just hit the highlights here...

I know you're asking: What is **Weekly Gems**?

I developed Weekly Gems as an options trading strategy for today's markets... markets where there's tons of fear and uncertainty.

Any day we might hear news of a rate change by the Fed, the war in Ukraine, trade wars with China, conflicts with Russia, and our own crazy elections!

I haven't even covered the normal market risks like companies hitting revenue and earnings estimates!

All this uncertainty creates **Volatility**.

Volatility is scary for most - unless you know how to harness it for profit.

When I designed Weekly Gems I focused on a system that can play the markets both ways. We need a trading strategy thriving in both up and down markets.

The strategy also needs to be optimized for every trader.

Most traders I know are not slinging tens of millions of dollars in a trade. We needed a strategy that works with small accounts... For the Weekly Gems strategy **most trades are just \$150 to \$500 bucks**.

The strategy also needs to scale so it can be used in all different account sizes. If you're trading two positions or twenty, the system needs to work.

As a result, I focused on the biggest stocks and ETFs. We trade a core group of stocks and ETFs with lots of liquidity and good price action...

Our focus is on trading weekly options or even Zero DTE options. These are very short term, quick strike trades.

That gives us a narrow list of stocks - **My Weekly Gems Hot List** - which I'll give to you in a moment.

By having a core group of stocks and ETFs to trade we get to really focus on a handful of trades, and get a solid feel for how they move and react over time.

MORE ON THE STRATEGY...

So it's clear in today's market we need a system focused on playing market uncertainty and volatility. We need a core group of trades, with weekly options or Zero DTE options.

The options need solid liquidity and good action. This allows us **low trade costs (normally under \$500)** and also gives us the opportunity to scale our trades - we can trade 2 or 20 (or more) options at a time.

The trades we take need to be structured so we have every opportunity to win... That means using options to structure trades so we can **win 5 different ways**.

PLUS, we need to fully define our risk on every trade. That means **knowing to the penny what our maximum risk level is - on every trade!**

Finally, we need to be able to repeat the process over and over again.

That means we need a strategy giving us multiple trades every week.

What I just described is the heart of the Weekly Gems Trading Strategy.

There's no need for software, indicators, complex trade rules, or crazy technical analysis. With Weekly Gems we do the work and hand you our trade setups.

It's that simple.

Now I know what you're really after... The Weekly Gems Hot List.

You want the list of stocks I like to trade most actively. Well, on the next page is a list of my favorite stocks to trade.

My Weekly Gems Hot List

Ok, this part of the report was the hardest to narrow down.

With the Weekly Gems system, my Hot List is now over 50 names! But that's too many to look at every day.

I knew I needed to narrow it down for you.

So, here's **the best of the best** when it comes to my Weekly Gems Hot List.

Key Stocks and ETFs I watch every day:

- 1) -SPY
- 2) -QQQ
- 3) -AAPL
- 4) -AMZN
- 5) -GOOGL
- 6) -MSFT
- 7) -TSLA
- 8) -NFLX
- 9) -JPM
- 10) -GLD

I look at these stocks and ETFs every day. After a while, you get a gut feeling for the market and more specifically how these stocks act.

The insight you'll gather will go a long way to making you a better trader!

Speaking of trading - let me share some real world trade examples...

[Watch the Webinar Now](#)

When you signed up for this free report - I gave you access to a free webinar training. In the webinar, I show you some real live trading examples.

I pull up the stock charts... I share the entry and exit points, I also share my thinking behind each trade.

I give you the exact trade we put on, I show you how to calculate the risk down to the penny, and I show exactly what happened.

I share with you the profits we made and even the losses we took.

Now I know what you're thinking - Losses! Who shows their losses?

Well, real traders do. Real traders, professional traders, know they can't win 100% of the time. You will have a loss. The question is how do you react when a trade moves against you.

That's what separates the trading Pros from the Pikers.

In case you missed it, [here's the link to the webinar](#).

I must warn you - the webinar will only be live for about a week. So watch it right now.

Good Trading!

FOR EDUCATIONAL AND INFORMATION PURPOSES ONLY; NOT INVESTMENT ADVICE.

NetPicks Services are offered for educational and informational purposes only and should NOT be construed as a securities-related offer or solicitation or be relied upon as personalized investment advice. We are not financial advisors and cannot give personalized advice. There is a risk of loss in all trading, and you may lose some or all of your original investment. Results presented are not typical.

Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any trading account will or is likely to achieve profits or losses similar to those shown, in fact, there are frequently sharp differences between hypothetical trading performance results and the actual results subsequently achieved by any particular trading program.

One of the limitations of hypothetical trading performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical forex trading performance results, and all of which can adversely affect actual forex trading results.

Past results of NetPicks are not indicative of future performance.

The monthly and composite annual results should be viewed as hypothetical.

In reality, the results do not represent the track record of the methodology originator or subscribers. This also means there is no guarantee that one applying these methodologies would have the same results as posted. Since trading successfully

depends on many elements including but not limited to a trading methodology and trader psychology, our website does not make any representation whatsoever that the above mentioned trading systems might be or is suitable or profitable for you.

In addition, it's important to understand and accept that there can be data outages and server failures. The brokers system might not be functional, the auto trading servers might have technical difficulties and there may be times where communication between accounts, the broker and the auto-trade program are not functioning properly. This can lead to greater risk. Markets also do not always guarantee exact fills. Periods of fast markets can cause greater degrees of slippage and less than ideal fills. There can be no guarantee that your account will always be able to enter and exit the program's ideal entry or exit point.

They carry a high degree of risk.

100% Unbiased Pledge: Employees, contractors and owners of NetPicks are expressly forbidden from owning any of the securities that they are recommending to subscribers unless clearly identified in their work. This ensures you are getting 100% unbiased research on investments our analysts have come across in their own due diligence.
